The Building Blocks of Numeracy: Manage and Master the K-5 Curriculum

Calm, Command and Conquer the Curriculum®

- The Building Blocks of Numeracy. When looking at the continuum of learning that takes place from kindergarten through grade 5 and beyond, there is no denying the importance of building number knowledge, the emphasis on the composition and decomposition of numbers, and use of powerful tools and visual models such as the number line. With a focus on the power of the primary grades, this session is designed to help educators manage the standards and properly pace the curriculum, understand the commonality and continuum that exists within the standards, and most importantly build a playground of numbers that supports all learners.

Calm, Command and Conquer the Curriculum®

Calm

- Focus on the Standards
- THINK BIG

Command

- Stories and Games
- PLAY HARD

Conquer

- Cultivate a Math Culture
- HAVE FUN!

Lynda Brennan

Lynda Brennan, has been in the educational arena for over 23 years. She currently serves as a K-5 Math Specialist in a New York State, Title 1 public school that has been recognized for its achievements. Brennan is the founder of Math4Minors and author of Math MileMarkers®, a standards-based children's book series and numeracy focused game resource. Two of the books in the series were recently reviewed in the March and April issues of NCTM's Teaching Children Mathematics Magazine.

Lynda is also the regional facilitator for NYSUT's Elementary Math PLC and serves as a board member for the Ten County Mathematics Educational Association, a local NCTM affiliate organization in lower Hudson Valley New York. Brennan has been a featured speaker at the National Conference on Common Core Instruction in Las Vegas, Nevada and at several teacher workshops including the Minds On Math Teacher Conferences in Columbus, Ohio. Other recent and upcoming conferences include the NCTM National Conference in San Antonio, NYS AMTNYS Conference in Rye, NY, The NYC Mathematics Project Annual Conference, TCMEA Conference in Lower Hudson Valley NY, the New Cubed Conference (NY, NJ, New England Math Conference) and the National Math Foundation's Math & Movement Conference in Utica, NY. Her message on how to Calm, Command and Conquer the Math Curriculum® has been well received by teachers and administrators across the country.
